

Java

Assignment -2

write a java program which would take two value through command line argument and print the sum of the two values.

program:

```
public class sum
```

```
{
```

```
    public static void main (String args[])
```

```
    {
```

```
        int a, b, sum;
```

8 →

```
        int a = Integer.parseInt(args[0]);
```

5 →

```
        int b = Integer.parseInt(args[1]);
```

Java command
line Argument

```
        int sum = a + b;
```

```
        System.out.println ("The sum of the two values!  
                             "+ sum);
```

```
    }
```

```
}
```

output:

The sum of the two values : 13
